5.	Changes compared to last revision	2

1. Background and purpose

SSAB is a leading global provider of high strength steel and we offer products developed in close cooperation with our customers to create a stronger, lighter and more sustainable world.

The world's demands for energy efficiency are constantly increasing. Not least new legislation and regulations are noticeable. Customers are also increasing their focus on energy efficiency.

The purpose of this Directive is to state the ambition of the energy work in SSAB and to stress the importance of energy management and individual accountability to develop our energy efficiency.

An important part of the energy efficiency work is to carry out energy mapping on a regular basis. This work is described in more detail in the accompanying group instruction.

2. Applicability

This Directive is mandatory and applies to all divisions, companies and employees in the SSAB Group.

3. Directive statement

When conducting the business the following apply:

- SSAB will continue to contribute to a safe, environmentally responsible, and profitable business model, by developing products and services in collaboration with customers and suppliers.
- SSAB will develop and supply the most optimized products for our customer needs and by everyone's engagement ensure production stability.
- SSAB will continue to use raw materials and energy in innovative and efficient ways, while minimizing waste.
